

## Press Release

### Sengled announces the availability of Solo 2 RGBW

*Sengled Solo 2 RGBW colors up your winter*

**Düsseldorf, October 06, 2017. Sengled, a leading manufacturer of innovative lighting solutions for the smart home, announces the availability of the Sengled Solo 2 RGBW right in time to start into the cold season. The color-changing bulb with an integrated Bluetooth speaker will liven things up at home. This year's International Electronics Fair IFA at Berlin already gave visitors a foretaste of the Solo 2 RGBW.**

#### Colour surrounds sound

The Sengled Solo 2 RGBW combines sound and light effects in one smart light bulb. The integrated Bluetooth speaker plays your favorite music from your smartphone or tablet. All you need is to download the app and hook up the bulb via Bluetooth.

#### Disco effects reflecting the sound

The Sengled Solo 2 RGBW delivers light effects in accordance with the sound. Choose from 16 million colors and five preselected color patterns to adapt the light to the music or mood. Thus, the living room becomes in no time a dance floor or a recreation area full of atmosphere.

The sleep mode of the Sengled Solo 2 RGBW lets the evening fade away in a relaxed atmosphere. It dims the light and reduces the sound level little by little.

#### Price and availability

Sengled Solo 2 RGBW will presumably be available from the beginning of December at a price of 49.90 EUR.

### About Sengled

Sengled is a leading provider of innovative lighting solutions based in Shanghai. The company has branches in Düsseldorf, the USA, Canada and Australia. Sengled holds more than 200 patents worldwide and specializes on lighting products for business customers and consumers around the world. Sengled offers high-quality and energy-efficient alternatives for conventional light bulbs. Sengled's LED solutions are the lighting solutions for the 21st century: They facilitate a new perception of lighting and guide the way into an energy-saving and cost-efficient world of luminosity. The company works according to the maxim of developing innovative products that have no unnecessary environmental impact during the manufacturing process. At the same time, its products feature long product life cycles, first-class light output and high efficiency. The vision is to inspire the world with new ideas for smart lighting products: The possibilities are endless. This is also symbolized by the sign of infinity in the middle of Sengled's corporate logo.
