

POWER OUT. LIGHT ON!

sengled
everbright

LED + INTEGRATED EMERGENCY LIGHT

- Battery activates the LED in the event of power outage
- Emergency lighting for up to 3.5 hours
- Your LED light, should the power be off for any reason

Everbright is your emergency lamp. If the power needs to be turned off for any reason, or if there is a sudden power outage, Everbright activates the emergency lighting for up to 3.5 hours. It's the optimum light for construction sites, tradesmen at work, campervan sites or as a security solution during power problems. Full battery performance after 6 hours.

Technical data

Model number:	1102160028
Energy supply:	220V-240V, 50Hz
Lamp base:	E27
Energy consumption:	9W (LED + battery), 6W (LED)
Operating temperature:	-20°C - +40°C
Usage environment:	Dry, IP 20
Luminous flux:	550 lumen (330 lumen emergency lighting mode)
Colour temperature:	3000 Kelvin
Colour rendering index:	> 80
Beam angle:	125°
Battery:	Lithium ion battery (7.4V, 900 milliamp hours)
Battery service life:	25,000 hours
Recharge period:	6 hours
Housing colour:	White
Dimensions:	Diameter (70mm), 140mm (height)
Weight:	230g
